Universal Receiver GE-RCV1

Instruction

Technical features:

|	
Frequency:	433,92 MHz
Code:	rolling code
Number of channels:	3
Power supply:	12/24 Vac/Vdc
Working current:	max. 50 mA
Memory:	30 remote controls

Works with:

Beninca, BFT Mitto, CAME Space, DEA Mio, DTM, FAAC
Fix, FAAC Lc, Hato, NICE Smilo, Normstahl, Wiśniowski.

Learning a code

Press and hold learning button **(1)**, when the red LED light **(2)** is on, release learning button **(1)**, then press any keys of the remote twice. The LED light **(2)** is off and then flashes - indicates that the code is learned successfully. Repeat this process to learn the second code.

Deleting existing codes

Press and hold the learning button **(1)**, the red LED light **(2)** is on, don't release this button **(1)** until the red LED light **(2)** is off - this indicates that all the codes have been deleted.
